# OUR STORY

## Celebrating three decades of sustainable pest control success

Over the past three decades, Shield has remained focused on delivering eco-friendly pest control solutions. With deep focus on Research & Development, we have brought to market innovative solutions that effectively eliminate pests while protecting the natural environment of humans, and their pets and animals. Our multidisciplinary R&D facilities employ leading scientists who remain on the forefront of chemistry and environmental sciences.

Shield's R&D & Marketing divisions were established in 1988 and merged to become Shield in 2018. The company has three centers of operations in Israel and China, and employs over 25 employees - who are all proud of their achievement serving satisfied customers across the world.

# OUR TEAM

## Engineering the future of pest control

Through science, we provide our customers with products that meet their current and future needs. R&D serves as our engine for growth through innovation, developing forward-thinking products that don't compromise the environment.

We use only quality raw materials to develop and produce sustainable, eco-friendly solutions that are proven effective to trap and eliminate unwanted pests without harming the surrounding. Shield offers a broad range of products addressing customers' existing and future needs and regulatory requirements.

Shield's advanced production line and lab facilities feature state of the art technologies. Our quality control process applies to all laboratory and production employees based on self-inspection and evaluation, ensuring continuous quality control and improvement.

## Assuring unrivaled quality control

Shield employs leading experts and employees who share a common goal - delivering quality green solutions for effective pest control and a sustainable future. All employees undergo training to comply with strict international quality standards.

# OUR VALUES

## INTEGRITY

Honesty and integrity forge our relationships with customers.

## SAFETY

Believe that only safe green products will sustain the future.

## QUALITY

Leading the market in quality eco-friendly pest control.

## PRODUCTIVITY

Hard work and efficiency are key to success.

## PROGRESS

We make progress one product at a time.

## POWER

Our human resource is our greatest source of power.

## Going above and beyond in compliance with ISO 9001 standards

For over three decades, Shield has remained committed to highest quality standards in strict compliance with global quality assurance regulations, to ensure consistent quality products to our valued global clients. To help customers meet their local regulatory requirements, our Quality Control & Assurance complies with global ISO 9001 standards. We go above and beyond, implementing internal quality control processes across our worldwide operations, and promoting environmental awareness to our employees and customers.

## Forward-thinking natural code of ethics

With principles deeply rooted in nature, we're driven by the will to make the world a better, greener place - taking full responsibility for the environmental safety of every project we engage in. Our love for nature guides us in everything we do, and inspires us to achieve the right balance when meeting market needs while maintaining harmony with the natural environment.

## Ecology is in our DNA

Shield has long-standing success developing ecological products that are effective at pest control yet harmless to the environment and its people. We've maintained this delicate balance without compromise in every product we developed or project we embarked on.

All Shield employees care deeply about the environment. Keeping is safe is not just a professional commitment, it's ingrained in our culture and company values. We apply decades of scientific know-how and practical experience to stay true to our conviction, making technological leaps while maintaining the natural balance.

# DISTRIBUTION

## Join the successes

Shield welcomes distributors worldwide to join our success.

Becoming a Shield Distributor presents a lucrative opportunity for distributors to stores, exterminators, farmers and more.

Shield offers an exclusive opportunity for distributors seeking to grow and expand their business. Our products have high year-round demand and sell at various convenient stores.

- General & DIY
- Gardening supplies
- Pest control & pesticides
- Professional exterminators
- More shops & locations

So what's in it for Distributors?

In addition to attractive prices and extensive product line backed by a global brand with a proven track record, distributors benefit from:

- Exclusive products
- Shipping across Europe
- Quick delivery (cartons, pallets and containers)

# Finito el Mosquito

**G Mosquito Repellent Granular**

# Finito el Mosquito

**L Mosquito Repellent Spray**

natural ingredients

400 g

essential oils

750 ml

Mosquitoes are a nuisance but some species also transmit diseases and parasites such as Malaria, Zika, West Nile fever and Meningitis. This natural mixture contains essential oils that create fragrance to repel mosquitoes from the surrounding. Instantly activates and remains effective for 48 to 72 hours. Suitable for both indoor and outdoor use. Contains no toxins.

This eco-friendly fragrance protects against mosquitoes, leaving a pleasant smell and no stains. Simply spray in the air to instantly repel surrounding mosquitoes for up to 6 hours. Effective for indoor or outdoor use.

# RO-GAL

Professional insecticide  
for crawling insects

# IMPACT

A unique combination  
for fleas and ticks

96cc mixture  
for 10 liters  
of water.

500ml

100cc mixture  
for 10 liters  
of water.

500ml

Professional insecticide against a wide range of crawling insects. Pests die upon contact, including cockroaches, ants, spiders and bed bugs. Full indoor broadcast application means the active ingredient can be applied in multiple places to kill numerous insects. The pesticide offers a favorable toxicity profile and fast-acting formulation that's non-repellent and long lasting.

A unique combination against fleas and ticks. Contains active Cypermethrin and insect growth regulator (IGR) Cyromazine to delay the creation of chitin and act quickly on the insect's skeletal development system. Effective extermination through prevention of flea and tick reproduction.

**BUG Insecticide is a powerful knockdown and residual pesticide.**

# BUG

**Dual action insecticide**

# ANTI ANTS

**Professional ants bait**

One bottle of 250cc can cover an area of 1000 square meters

100% mosquito solution las for a period of 4 months

Extra small grains

250 ml

200 gr.

Dual-action pest-control formula. Mosquitoes are controlled when making direct contact or contacting residuals on the treated surface. Especially useful against Yellow Fever mosquito (*Aedes aegypti*) and the Asian Tiger mosquito (*Aedes albopictus*). A powerful knockdown and residual pesticide.

Super attractive bait for fighting a wide range of ant species. Ants take bait into the nest to feed queen and ant population thus eradicating the nest. Extra small grains enable even very small ants to carry the bait into the nest.

## BUG 250ML

# BIG EYE

## Real time Rodent control system

Real-time rodent monitoring and control system. Upon touching the treading surface, the pest control team receives instant text alert. Easy Plug & Go installation using AAA batteries for two years of operations.

Real-time rodent monitoring and control system. Upon touching the treading surface, the pest control team receives instant text alert. Easy Plug & Go installation using AAA batteries for two years of operations.

### What is the BIG EYE system?

Feeding Station I.O.T. is considered amongst professional exterminators as one of the leading system in their field. Last-Shield is proud to introduce the "Treading Surface". A surface with extremely sensitive sensors. This surface sends an instant message to two selected numbers as soon as a rodent touches it.

### How does it work?

The systems sensors detects rodent entry into the station and sends an SMS message to 3 selected Mobile phones. Information of alert received and saved: Time, date and station number.

Immediately after the alert is sent the exterminator arrives to the detected station and treat the problem on the spot in real time.

BIG EYE alerting system saves tremendous time during work and saves substantial travel time for routine check up and monitoring.

Such quick and accurate solution was not available until now.

Installing the system is very easy with the insertion of pre-coded SIM card.

BIG EYE's USP (United States Pharmacopeia)  
Feeding stations and monitoring placed worldwide in various locations in food factories, hospitals, cosmetics plants, industrial/public kitchens and many more.

### How does it work today?

The Pest control company arrives to the customer's site and takes record of the locations where the rodent's presence occurred and assumes that the rodent was in fact in that area. Yet, it is time consuming and relatively inaccurate operation.

### BIG EYE is here to make a BIG change!!!

From the moment the terminating station was placed we can count on an always receiving accurate information. Receiving immediate report that a rodent made physical contact with Station No. 4 that located at main warehouse, at 23:11! The Exterminator or the maintenance manager respond immediately and accurately and address the problem by adding poisons, placing traps, sealing openings or any other solution.

BIG EYE provides efficient, immediate service to the customer with economical solution. The customer receives a real-time reporting and solution and manages pest control effectively. The exterminator saves valuable time and costs avoiding unnecessary on-site visits when receiving alerts.

The Pest control company install 12 BIGEYE stations at the plant

Rodent enters station number 4, at 23:11 at computers control room...

The rodent steps on the treading floor. Alert sent to the 3 mobiles...

The Pest control company and the customer receive a mobile alert

The exterminator arrives and decide how to continue treatment

The station was checked and is ready to next event...

you can Select between a large system consisting of multiple end stations or a single unit operating independently.

CODE No: BIGX5

5 BIG EYE SET

5 station in pack

10 Stations in master Carton

CODE No: BIGX1

SINGLE BIG EYE

1 station in pack

4 Stations in master Carton

### BIG EYE - Your benefits guaranteed.

- Avoid power supply - Use AAA battery for one year operation.
- The system installed inside the feeding station and includes pre-coded SIM card that is valid for one year from the time it is activated.
- No monthly charges.
- "Plug and Go" - Simple installation.
